Recapturing the convivial spirit of Sydney's formative years, The Doss House unites fine spirits & cocktails with the historical charm of one of the city's oldest suburbs, The Rocks. Built in the 1840s, this space has been the home to a rich, eclectic collection of tenants including a bootmaker, boarding house, doctor's surgery & opium dealer, some which have been entwined within the interiors of the five, cosy bar spaces. The result is a bar steeped in character, ambiance & history. Welcome to The Doss House.

Lowland whisky is most commonly gentle and light, often lacking in any serious peaty flavours. Commonly known as the “Lowland Ladies”, these drams will often offer a gentle, elegant palate reminiscent of grass, honeysuckle, cream, ginger, toffee, toast and cinnamon. This sophisticated style is a result of the unique triple distillation only common in the Lowlands, and has resulted in Lowland whisky being uniquely suited to introduce malts to new whisky drinkers.

Campbelltown was once one of the most prolific regions in Scotland, sadly as prohibition affected the area and until recently there were only 2 distilleries producing whisky. Campbelltown sits on the mull of Kintyre, very close to the sea. This imparts a slight coastal character onto their whisky, but they are mostly known for their dryness and often their pungency.

If you roughly drew a line between Edinburgh and Glasgow, everything above that would be the Highlands. The Highlands is Scotland's largest whisky producing area, covering to the north of Glasgow all the way to Wick in the north, not to mention the east and west regions excluding Speyside. Due to the large area, whisky in the Highlands is very diverse and offer a vast amount of different flavours so it's hard to put a certain style on Whisky from this region. Typical notes from this region would be of peat, honey, and heather in a much more robust, dry body.

The small island of Islay is tucked away in Scotland's southernmost part of the Inner Hebrides. Due to unique make up of the peat on the island, Islay malts are pungent with smoke, brine and peat on the nose, but multilayered on the palate, displaying anything from mossy, peaty, floral mixes to peppery linseed and soapy hints. This complexity of layers is the reason Islay malts are often prized as the best in Scotland.

The region of Speyside is located in the north east of Scotland surrounding the River Spey, it's seen to be more of a sub-region to the neighbouring Highlands because of the high density of distilleries in the area. It's home to highest number of distilleries in Scotland with well over 60 at present. Due to the sheer volume of distilleries, there's a huge amount of difference in the character of Speyside Scotch, from lighter grassy numbers, to the sweeter, richer, sherried type. The single malts from the area are notable for their refined smokiness and complexity.

Australia

Australia has had a long history of spirits and distilling dating as far back as the first fleet when convicts and settlers landed in 1788, there was also 65,000 litres of rum to accompany them. Hard liquor was so valued it even became the currency at the time, Australia's first! But this burgeoning market wasn't to survive. In 1839 the distillation prohibition act banned colonial distillation altogether and it was to be another 153 years before anyone was granted a distilling licence.

Fast forward to 1992, lark distillery founder Bill Lark who not only resurrected Tasmanian distilling, but distilling all across Australia. At the end of 2017, there were more than 120 listed distilleries in Australia with 31 of these in Tasmania. These new world whiskies have been highly praised internationally, even so in 2014 Sullivan's Cove French oak cask winning best world's single malt, the first time a distillery outside Scotland or Japan had won the award.

Ireland

Deriving from the term uisce beatha – meaning ‘water of life’ – even the word whiskey has Gaelic roots. One of Europe’s earliest distilled beverages, the first record of Irish whiskey dates back to 1405, around 90 years before it was first recorded in Scotland. Producing Irish whiskey evolved from a local pastime into an industry in 1608, when Northern Ireland’s Old Bushmills Distillery became the world’s first licensed whiskey distillery. Much of current production is distilled using a mixture of grains and unmalted barley, oats, wheat and rye.

Triple distillation is also very common which results in a lighter, fragrant dram and a more approachable way to start drinking whiskey.

America

American whiskey is a distilled beverage produced in the United States from a fermented mash of cereal grain. Among the types included under this designation are bourbon whiskey, rye whiskey, rye malt whiskey, malt whiskey, wheat whiskey, and corn whiskey. All of these are made from mashes with at least 51% of their named grains.

Japan

Japanese whisky owes its origins to Scotland. Masataka Taketsuru, whose family owned a sake brewery is known as the 'Father of Japanese Whisky'. After studying chemistry in Glasgow and working closely at the Longmorn Distillery, he then returned home and founded the Suntory Yamazaki Distillery with Shinjiro Torii. 10 years later Taketsuru went on to open his own distillery - Nikka Yoichi. Developments in whisky production including the use of a Coffey Still, utilising Japanese oak to finish whisky and reduction of lipids in wort have resulted in a delicate and floral dram that encapsulates pure harmony and balance.
